PROFESSIONAL PROFILE

Software Engineer with 6+ years of experience designing and shipping high-performance, reliable systems end-to-end. Specialized in building scalable backend services and APIs with NestJs and Node.js and crafting maintainable frontends with React and TypeScript. Experienced in clean architecture and driving technical standards across teams.

EXPERIENCE

FullStack Developer at **Masiv (Proximus) –** (September 2019 - Now)

Progressed through multiple roles and teams designing and evolving both backend services and frontend products. Contributed to system architecture decisions, AI design, data modeling and frontend standards across multiple product lines.

- Designed and delivered scalable REST APIs and microservices using NestJS, Node.js, and TypeScript, applying Clean Architecture and Domain-Driven Design to ensure modularity and long-term maintainability.
- Established API architecture standards and contract governance (OpenAPI/Swagger), aligning multiple teams and improving consistency and integration reliability across services.
- Owned and executed the migration from a deprecated UI library to modern tooling, reducing technical debt and unblocking team delivery.
- Drove architectural decisions and trade-offs, balancing delivery speed, scalability, and technical debt, contributing to more stable and evolvable systems.
- Established CI/CD pipelines, automated testing gates, and deployment standards across teams reducing deployment times by 80%+ and frontend delivery cycles by 40%.
- Collaborated in cloud-based environments leveraging AWS services, contributing to deployment workflows and improving integration between frontend and backend systems.
